

In dialogue with EU and world bodies to promote a workable energy policy framework that will ensure reliable and sustainable electricity supply to citizens and industry...

- *supporting* the development of an open, competitive energy market in the service of customers, with diversity of choice and fair opportunities for all actors and stakeholders
- *promoting* sustainable development and care for the environment through realistic, market-oriented policies
- *fostering* a wider European energy market by helping new EU Member States, candidate countries and neighbours assimilate EU rules and regulations pertaining to energy
- *working* to maintain a competitive electricity industry capable of delivering quality products and services in support of an efficient modern economy and the advancement of society
- *providing* vital information and support to ongoing policy dialogue

EURELECTRIC is the professional association which represents the common interests of the electricity industry at pan-European level, plus its affiliates and associates on several other continents. Our mission is to contribute to the development and competitiveness of the electricity industry and to promote the role of electricity in the advancement of society.
