

Sustainable forestry in focus

Sveaskog is Sweden's largest forest owner, with 15% of the country's productive forest land. We are a leading supplier of sawlogs, pulpwood and biofuel. We work with land sales, offer hunting and fishing opportunities and make land available to local entrepreneurs within eco-tourism.

Sveaskog contributes to economic development through long-term, sustainable forest management, with good social responsibility. Our forestry is conducted according to the Swedish FSC standard.

The forest is our core business and we lead the way in the development of forest values.
