

Itaú Unibanco: the most sustainable bank in emerging markets, as recognized by the Financial Times Sustainable Banking Awards.

Thinking big means embracing the concept of a sustainable world.

For the largest private bank of the southern hemisphere, climate change is one of the main challenges for the present and the future. That is why we have been investing in the search for solutions to reduce the gas emissions that cause the greenhouse effect. We are a signatory and worldwide coordinator of The Equator Principles, and a signatory and respondent to the Carbon Disclosure Project. Recognized as the most sustainable bank in emerging markets,* the most sustainable and ethical bank in Latin America**, and the only bank in Latin America in the Dow Jones Sustainability Index since its inception.

*Financial Times Sustainable Banking Awards **Latin Finance/Management & Excellence
