

LESS ENERGY, MORE EARTH.

The less power we take, the more power we give.

We're pioneering new innovations that help everyone help the Earth. Energy efficient computers that together would save enough to power 90,000 homes for an entire year. Printing solutions that save millions of pages and reduce our customers' energy usage by 40%. And our own organization's goal is to reduce our carbon emissions 20% by 2013. That's just now. What lies ahead will be nothing short of amazing.

CREATE AMAZING/EARTH
