

We didn't choose brown, it just came naturally.

Knauf Insulation mineral wool with ECOSE® Technology doesn't look or feel like any insulation you have ever experienced!

It offers superior handling and its natural brown colour represents a level of sustainability never before achieved. Knauf Insulation mineral wool with ECOSE Technology is manufactured from naturally occurring and recycled raw materials, and is bonded using a bio-based technology free from formaldehyde, phenols, acrylics and with no artificial colours, bleach or dyes added.

- Friendlier handling: softer feel, less dusty and odourless
- Improvement of indoor air quality and overall sustainability of buildings compared to conventional mineral wool
- Maintains the high performance of our conventional mineral wool: thermal-, fire- and acoustical performance
